Quick Start Guide

Welcome to your Color Muse 2

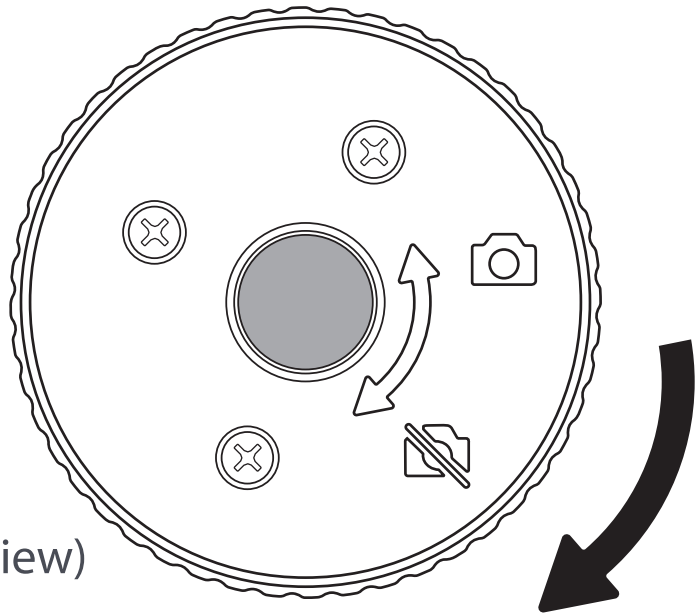
Color Muse 2 is a color and sheen matching device that provides accurate, on-the-go color matching. Scan the color of any flat surface to match the color to the closest paint colors, textiles, and products. Save colors and create folders to share. Color Muse 2 takes the frustration out of finding that perfect color by ensuring you find the closest available match.

1. Download and Launch the App

Download the Color Muse app on your smartphone through the App Store or Google Play. Sign up or log in with your email address.

2. Connect and Calibrate

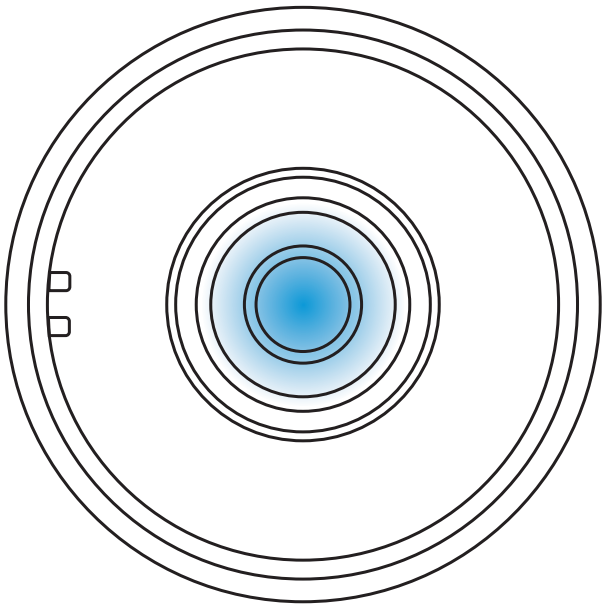
Ensure the shutter on the device is closed by lightly twisting the dial (3) clockwise (Fig. 1), then tap “Connect Device” within the app.



(Fig. 1 bottom view)

Double press the wake button (1) on Color Muse 2. The wake button (1) will intermittently glow blue (Fig. 2).

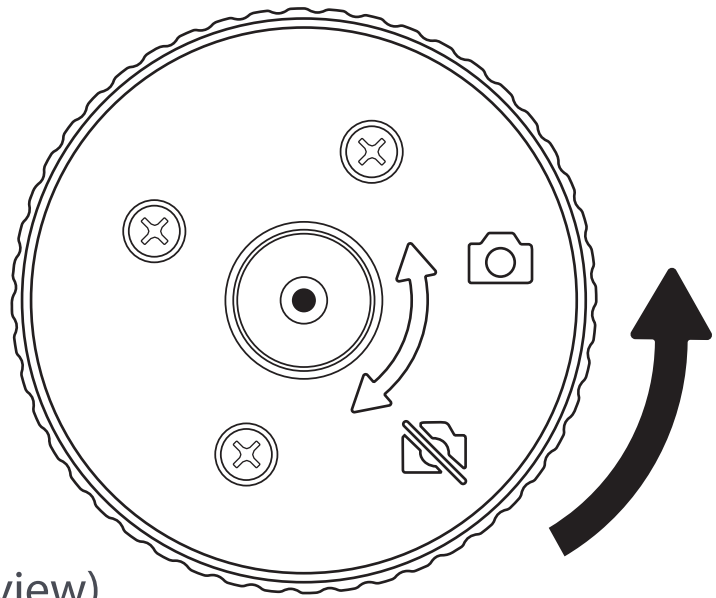
Once the app locates the device, you will see the Color Muse 2 and serial number appear on the screen. Select your device in the app to pair.



(Fig. 2 top view)

Color Muse 2 will automatically calibrate during the connection process. Once the device is connected, turn the dial (3) counter-clockwise to open the shutter (Fig. 3).

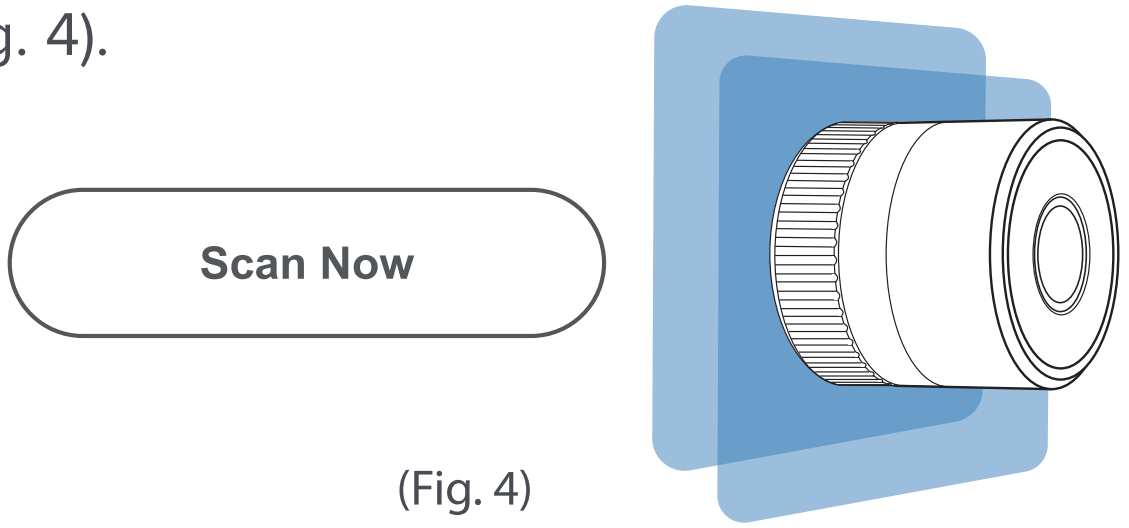
You’re now ready to scan your first color.



(Fig. 3 bottom view)

3. Capture and Create

Place Color Muse 2 directly onto the color you want to measure and tap ‘Scan Now’ in the app (Fig. 4).



(Fig. 4)

The scanned color will appear (screen display color may not appear accurate). Matching results will be displayed with the closest match listed first, second closest match second, etc.

Tips and Troubleshooting

Low battery level might affect the accuracy of the color match. To keep your Color Muse 2 in top working condition, prevent leaving the battery fully drained for long periods of time.

If Color Muse 2 does not connect, press and hold the wake button (1) for 15 seconds for a hard reset. Start the connection process again.

If the app crashes on launch, please delete and re-download the app.
